

GCSE CHEMISTRY

- 1. Practice the maths. It comes up so much and easy marks once you know it.**
- 2. Learn definitions (e.g what is an isotope)- again easy marks.**
- 3. Be familiar with graphs and tangents and the difference when they ask for the mean and when at a specific time.**
- 4. KNOW YOUR PRACTICALS. YOUR BLESSED IF YOU GET A 6 MARKER.**
- 5. Practice questions-use PMT, Cognito, FreeScienceLessons, AmoebaSisters**
- 6. USE US. We are here for free to help YOU on your educational journey.
We've got our grade 9s so use us.**
