

# GCSE MATHS

1. **Practice.Practice.Practice**
2. **You don't need to get every mark and every question correct for a grade 9. Focus on accuracy and nailing the first questions.**
3. **Practice harder questions. There are patterns- with practice you will spot them.**
4. **USE past papers- don't limit yourself to your exam board. Try others**
5. **Show all your working and DON'T immediately cross out all your working. Leave it until you try again and get a new answer.**
